

THE DOCUMENTS FOR

# *GLOBAL CHOAS EXPLAINED*

Glenn TV | EP 274

*Wednesday, May 3, 2023*

## Can you piece these seemingly random events together?

- So much of what we're seeing right now just doesn't make sense if you look at it through the wrong lens.
- Look at some of these stories over the past few weeks and months.
- The Germans, in the middle of an energy crisis AND WAR in Europe, just shut down their last nuclear plant. Does that make sense?
  - <https://apnews.com/article/germany-nuclear-power-plants-shut-energy-376dfaa223f88fedff138b9a63a6f0da>
- This United States Energy Information Administration is *bragging* that reliable energy will account for 98 percent of power plant retirements *this year*.
  - <https://www.eia.gov/todayinenergy/detail.php?id=55439>
- The transition to reliable energy will account for 15.6 gigawatts of American energy.
- Unless the government has some master plan to channel more than 15 bolts of lightning into the power grid, we might have a problem.
- Europe is forcing farmers to adapt to their ridiculous regulations over the climate *or* have their land seized by the government.
  - <https://www.theguardian.com/environment/2022/nov/30/peak-polluters-last-chance-close-dutch-government>
- In the U.S., the Farm Bill expires this year and is up for a revote. With Joe Biden in the White House, this couldn't come at a worse time.
- They're already trying to sneak in "Climate Action" and "Racial Equity" into the Bill. Europe, here we come.
  - <https://foodprint.org/blog/farm-bill-climate-action-racial-equity/>
- We're being hit on multiple fronts, including college campuses and corporations that are all but being forced to have offices of Diversity Equity and Inclusion that operate as some form of political commissar for the radical Left.
  - <https://thehill.com/opinion/education/3979620-the-rights-demonization-of-campus-diversity-equity-and-inclusion-programs-must-end/>
- That sounds a lot like China. The CCP will be placing government officials in 100 companies, according to Alibaba.
  - <https://www.cnbc.com/2019/09/23/china-to-place-government-officials-in-100-companies-including-alibaba.html>
- Why is all of this happening right now? None of it makes sense, but it all becomes a lot clearer if you look at it through the right lens.

---

**Glenn's book *Agenda 21* predicted much of what we're now seeing come to fruition today.**

- Glenn wrote his book *Agenda 21* as a fictional warning of what life might look like if the UN and global elites were successful.
- *Agenda 21* was the Great Reset long before the overlords in Davos came up with that name.
- Glenn's book was fictional, but many things Glenn wrote in it back in 2012 still ring true.
  - <https://www.glennbeck.com/glenns-books/agenda-21>
- Take this as an example: "There is no president. No Congress. No Supreme Court. No freedom."
- Have you ever known of a time where we questioned whether we actually had a president? How about right now?
- Biden has stated multiple times that he is the one that takes the orders. We have a "Figurehead-In-Chief" that speaks when his handlers tell him to, and says only what they tell him to say.
- Moreover, what does Congress even do anymore? We've seen *multiple* times one party or the other have control of both the House and Senate... but nothing ever happens. Does anyone seriously trust Congress?
- And we are losing SCOTUS. The Left wants to pack the Supreme Court. What real purpose will they have once that happens?
- Finally, and most importantly, we are losing freedom. How quickly is it becoming a thing of the past. COVID-19 proved that all too painfully.
- *Agenda 21* also describes a world where private farmland is a thing of the past. In the book, farms are state-owned in the name of climate protection. Now this is happening *all over the world*.
- The book describes a government that enacts new media laws. Only the approved message is allowed. Sound familiar?
- This tweet hits the nail on the head: "Federal regulations" will decide what's allowed, and *they* will decide what is or isn't "incitement of violence". Where did the First Amendment go?
  - <https://twitter.com/EndWokeness/status/1650184688508583936>
- *Agenda 21* describes the roles of families and how our children were collectively owned. Look at this *disturbing* statement from Biden:

- <https://twitter.com/RNCResearch/status/1650570353905893376>
- Collective ownership of children has been a socialist and progressive talking point for over a century. The masks continue to come off.
- In this dystopian world, people are moved into “planned communities,” similar to the 15 minute city project we’re starting to hear about.
  - <https://www.15minutecity.com/>
- The World Economic Forum has a Council of the Future of Cities where they plan what they call Smart Cities. This is how they see *our* future. Not theirs, but *ours*.
  - <https://www.weforum.org/communities/gfc-on-the-future-of-cities>
- The citizens in *Agenda 21* receive their instructions and news from something called “Social Update Meetings.” It’s there that they are told what behavior is acceptable. Does this not sound familiar to Diversity Equity and Inclusion and ESG?
- Glenn’s book, *Agenda 21*, was aptly named after “Agenda 21,” which was first proposed by the United Nations back in 1992.
- In 1997, the Kyoto Protocol was established to start taking Agenda 21 from concept to reality. In the end, too many nations—including us—pulled out. But that didn’t stop them.
- Now, it is getting a rebranding.
- In 2015 Agenda 21 received its first rebranding. The UN NOW called it Agenda 2030, but it was all just the same proposals from the original Agenda 21 doctrine.
- 2015 was also the year the words Build Back Better were first used.
- The United Nations Office for Disaster Risk Reduction used the words describing the need to make changes in the face of disaster.
- Read this document for yourself, a lot of the climate and equity mumbo jumbo that we’re seeing enacted right now is described in these 37 pages.
  - <https://www.undrr.org/publication/sendai-framework-disaster-risk-reduction-2015-2030>
- Similar to the Kyoto Protocol, the Paris Accord went into effect in 2016 to start implementing Agenda 2030.
- President Trump would end up pulling us out of the Paris Accord, severely derailing the entire plan. But something came that put everything back on track: The COVID-19 pandemic in 2019/2020.

- The pandemic did what we never imagined would happen. It brought the world's corporate elites to move *in parallel* with the policy makers.
  - That brings us to 2023: Do you recognize this country anymore? Is this the country you grew up in? The transformation has begun, and *you and I* are right in the middle of it.
- 

### **The media is now a part of the establishment.**

- Glenn believes Tucker Carlson was fired because he was the only person in the mainstream media who would stand up and say things like, “yeah, the CIA probably killed JFK.”
- The media is *supposed* to be antagonistic towards the government. It's their *main job*.
- Now, the media supports the establishment, and they run cover for organizations like the Pentagon, CIA, Big Tech, and anyone else progressing the agenda.
- Take this, as an example. The following document is the sworn declaration of a 9/11 investigator with the Department of Defense's Military Commissions Defense Organization.
  - <https://www.floridabulldog.org/wp-content/uploads/2023/04/Canestraro-Declaration-dated-20-July-2021.pdf>
- The document is dated July 20, 2021, and it first appeared on a former *Washington Post* journalist's Substack: Jeff Stein's Spytalk.
- Take in THIS incredible allegation from *multiple FBI agents* detailed in the article: The CIA was running an illegal domestic spy agency inside the United States.
- The declaration further states the Saudis were being used as intermediaries to recruit Al-Qaeda operatives for the CIA.
  - <https://www.floridabulldog.org/2023/04/ex-fbi-agents-accuse-top-cia-fbi-officials-9-11-coverup-cia-domestic-spying/>
- The document says “Al-Bayoumi was an intelligence officer in employ of the Saudi Government” and that he was “directed to attempt to recruit” two of the 9/11 hijackers at the Saudi consulate in Los Angeles.

- <https://www.floridabulldog.org/wp-content/uploads/2023/04/Canestraro-Declaration-dated-20-July-2021.pdf>
- Let that sink in. This declaration alleges the CIA *knew* the 2 hijackers were inside the United States.
- They wanted to recruit them through an illegal domestic espionage operation, and hid everything from the FBI.
- This information JUST CAME OUT. Why isn't it all over the mainstream media? If the CIA was running illegal operations that accidentally led to the worst tragedy on American soil, does that not seem newsworthy?
- The declaration was drawn from interviews of "11 ex-FBI agents, 2 ex-CIA agents, a CNN investigative journalist, former deputy National Security Advisor Richard Clarke and former Sen. Bob Graham (D-FL), co-chair of Congress's Joint Inquiry into 9/11."
  - <https://www.floridabulldog.org/2023/04/ex-fbi-agents-accuse-top-cia-fbi-officials-9-11-coverup-cia-domestic-spying/>
- This is an AMAZING claim, but the media could care less. Why? Because they are *now* the establishment, and calling out the CIA right now hurts the narrative.
- This is more believable than ever after it came out that the former CIA Deputy Director, in corroboration with the Biden Campaign, orchestrated the smear of the Hunter Biden laptop story as Russian disinformation.
  - <https://freebeacon.com/biden-administration/ex-spy-who-discredited-hunter-bidens-emails-used-wapo-column-to-boost-joe-biden/>
- When asked by Congressman Jordan why he did this, his answer was simple: "Because I wanted him (Biden) to win the election." And 50 former high level intelligence officials helped.
  - <https://twitter.com/JudiciaryGOP/status/1649202188684611584>
- CIA agents are now agents of establishment transformation. And they aren't alone.
- Multiple Pentagon officials cheered the fact that Tucker Carlson was fired. Censorship is now a Department of Defense priority now.
  - <https://thepostmillennial.com/pentagon-officials-say-were-a-better-country-now-that-tucker-carlson-is-off-the-air>

- The most recent Twitter Files exposed that the DoD has been actively working with their private partners to silence freedom of speech—private partners meaning Twitter and other social media titans.
  - <https://twitter.com/NAffects/status/1650954036009398277>
- The DoD awarded a near \$1 billion contract to an American technology company to combat “misinformation.” That’s your taxpayer dollars at work.
  - <https://www.peraton.com/news/dod-awards-1b-contract-to-peraton-to-counter-misinformation/>
- The Twitter Files revealed multiple email chains between members of Big Tech, the DoD and universities.
  - <https://twitter.com/NAffects/status/1650954045186625536>
- The government, military, federal law enforcement and intelligence are all teaming up to shut *you* down and control what *you* hear and see.
  - <https://www.amazon.com/Google-Leaks-Whistleblowers-Expos%C3%A9-Censorship/dp/1510767363>
- Two years ago, a whistleblower exposed that Google was operating blacklists to hide search results.
- For some odd reason they didn’t want anyone at all finding information on the Las Vegas mass shooting. They were also blacklisting information on terrorist attacks that happened in New York City. Now why would they do that? Was the FBI asking them to?
  - <https://books.google.com/books?id=faA4EAAQBAJ&printsec=frontcover>
  - See pages 93 and 95 regarding the Vegas shooter.
  - Moreover, they censored GLENN! Look at page 100.
- They’re all working together to change how you think to *limit* what you see.
- Michael Shellenberger recently pointed out Facebook has now taken a side on who blew up the Nord Stream pipeline. Why would they think they have any skin in that game if not for government pressure?
  - <https://twitter.com/shellenberger/status/1648822680295186432>
- If you try and post the article by Seymour Hersh that blames the United States, Facebook rates it false, and they send you this fact check by the Norwegian website “Faktisk.”
  - <https://www.faktisk.no/artikler/zw8np/flere-feil-om-norsk-innblanding-i-nord-stream->

[sabotasjen?fbclid=IwAR0hds6lX7h0Dt4CRnRL-oz-S\\_UmIIYtcmAs7\\_8GhPhqwfXWFaC6ruladeo](https://www.facebook.com/sabotasjen/?fbclid=IwAR0hds6lX7h0Dt4CRnRL-oz-S_UmIIYtcmAs7_8GhPhqwfXWFaC6ruladeo)

- Is it a coincidence Norway was implicated in Hersh's article as having helped the United States blow up the pipeline, and, ALSO, that Faktisk is a cooperation that includes the Norwegian Broadcasting Company?
  - Most of this is going on in secret, but sometimes our dystopian future is debated on in public. Listen to this debate in Minnesota on legislation called The Bias Registry Bill.
    - <https://twitter.com/CitizenFreePres/status/1651289052170076167>
  - What's being proposed is a database that tracks *unapproved speech*.
- 

### **Agenda 21 is now being pushed from corporate boardrooms.**

- 2020 was a massive turning point for Agenda 21 and Agenda 2030.
- What was mostly an initiative discussed within the halls of the UN had near full partnership from the elites who gather every year in Davos.
- The concentration then became on how they could force this radical transformation on every corporation, every bank, and every financial institution in places like the United States.
- The solution was a model that dated back to the Obama Administration: Occupy Wall Street.
- However, this time, the pressure campaign wouldn't come from the street activists. It would come from the largest financial institutions in the world, and it was very clear what they planned to do based off their 2020 World Economic Forum guest list.
- One of the attendees was the Occupy Wall Street co-founder Micah White, who said, "Rejecting Davos is easy when one hasn't been invited. Now that I have a chance to go, I want to discover its revolutionary potential."
  - <https://www.theguardian.com/commentisfree/2020/jan/18/occupy-wall-street-davos>
- This is *crazy*. Just a few years prior, White *hated* everything about the people that gathered in Davos. Why does he *now* see them as an ally?
- Keep in mind the date: January 2020.

- The COVID pandemic was just kicking off, and the Great Reset was being branded.
- “Revolutionary” change was coming, and while organizations like the intelligence community, FBI and Big Tech were the AGENTS of transformation, Big Finance and Big Corporations would finance the transformation.
- Activists no longer needed to camp out in front of banks or Wall Street anymore. People like Larry Fink at Blackwater would do that *from the board room*.
- Big Finance like BlackRock has its tentacles into nearly every major corporation in the country. Their main goals appear to be for two things: to force compliance and force transformation.
- We need to consider their meddling in every major decision and move these companies make.
- Take for instance the recent firing of Tucker Carlson.
- BlackRock owns over 45 MILLION shares of the Fox Corporation.
  - <https://www.nasdaq.com/articles/blackrock-increases-position-in-fox-corporation-foxa>
- Now, if the entire purpose of ESG, which is pushed heavily by BlackRock, is to encourage investments in clean energy and ideologically approved companies, why invest so heavily in Fox?
- This gets into the nuts and bolts of what the elites at the WEF, and Big Finance, are actually doing to force this transformation.
- Check out this interview between the *New York Times* and Larry Fink:
  - <https://www.youtube.com/watch?v=-cCs9Kh2Q08&t=1s>
- Fink *admits* his investments are the new Occupy Wall Street.
- As Klaus Schwab would say, they “penetrate the cabinets,” or in this case “Boardrooms,” and they use their voting leverage to *force* behavior.
- Larry Fink telegraphed this over two years ago, sending a written notice to boardrooms all over the country to increase their work to fight against climate change. Talk about infiltration: just look at a list of some of the largest companies they have major influence with.
  - <https://www.forbes.com/sites/michaelperegrine/2021/01/26/larry-fink-turns-up-climate-change-pressure-on-boards/?sh=77488aba3010>
- Scroll through some of the companies and industries that are backed by BlackRock.
  - <https://stockzoa.com/fund/blackrock/>

- You can find the full list posted on glennbeck.com.
    - <https://www.glennbeck.com/contributor/top-33-companies-blackrock-funding>
  - From these boardrooms they can push any message they want from some of the largest culture driving forces in the world.
  - They can influence car companies to go electric, fossil fuel energy plants to retire early, and maybe even a media company to fire the most popular opinion personality in the United States.
  - If anyone in the media tries to say that all of this is no big deal, check out this 2018 *New York Times* article. They were all but cheering BlackRock's pressure tactics.
    - <https://www.nytimes.com/2018/01/15/business/dealbook/blackrock-laurence-fink-letter.html>
- 

### **The scope of BlackRock's infiltration.**

- The transformation on the banking industry and corporate America has been quick and lethal, and it spans nearly every industry.
- Due to a BlackRock credit facility of \$4.4 billion, Wells Fargo is offering cheaper loans to companies that adhere to racial and gender quotas.
  - <https://freebeacon.com/latest-news/how-business-giants-get-lower-interest-rates-for-meeting-diversity-quotas/>
- Bank of America encourages their employees to become "woke at work," and that the United States is a system of "white supremacy."
  - <https://www.city-journal.org/article/bank-of-america>
- BlackRock owns 509 *million* shares in Bank of America.
  - <https://www.investopedia.com/articles/insights/052616/top-4-bank-america-shareholders-bac.asp>
- Lockheed Martin sent their white male employees to a three-day diversity-training program to address their "white male culture" and their "white male privilege."
  - <https://www.city-journal.org/article/the-woke-industrial-complex>
- BlackRock shares in Lockheed total nearly \$18 *million*.
  - <https://fintel.io/so/us/lmt/blackrock>
- The list could go on forever. These dots are so easy to connect it's painfully obvious they're not trying to hide it anymore.

- Big Finance assumes they have more money and influence than YOU do: the consumer. The Bud Light/Dylan Mulvaney story has proven otherwise.
  - Show these companies who the *real* boss is, and together we can stop the financiers of transformation before it's too late.
- 

## The dangers of ESG and DEI.

- Over the past several years, Glenn has talked a lot about the dangers of ESG.
- It's the leverage for this transformation into Agenda 21.
- We've seen a lot of success against the "E." Not so much with the "S" and "G."
- I just showed you how Big Finance is using "G" (governance) to force behavior in corporations all over the country.
- But the "S" (Social) is just as dangerous.
- In Glenn's book *Agenda 21*, people got their approved instructions and behavior from things called Social Update Meetings. That's *exactly* what the "S" in ESG is all about.
- It's a mechanism that pushes society into an *approved* narrative of behavior. You don't look to God, your values or anything or anyone else; you look to the government. *They* tell you what to think and believe in.
- The "S" is currently being pushed by something called "Diversity Equity and Inclusion" or DEI. It's popping up in companies all over the country. This list of companies that now have fully staffed DEI offices is *staggering*.
  - <https://purposebrand.com/blog/diversity-report-examples-fortune-500/>
- The industries include Big Tech, credit card companies, communications, financial institutions, healthcare, heavy equipment, energy, Big Pharma, and more. You can find the list on glennbeck.com.
  - <https://www.glennbeck.com/contributor/top-33-companies-blackrock-funding>
- Google even produces an annual "Diversity Report" where they brag about just how woke they are.

- <https://about.google/belonging/diversity-annual-report/2022/>
- For most of the biggest corporations in the country right now, hiring the most talented people and promotion based *on merit* is no longer the goal.
- It's now a *quota* system to make sure every race and gender is fully represented.
- *Representation* drives employment—not talent and ability.
- This agenda isn't merely being forced on corporations by Big Finance. It's also being used *as programming* on an entire generation—our children—through universities.
- They are being told that inclusion by *exclusion* is the new *proper* way of thinking.
- Before you sign that next tuition check, take a look your child's Core Requirements for a basic degree.
- Many universities now *require* multiple courses in Diversity Equity and Inclusion. Is that worth the money you are paying? Why are we paying *thousands of dollars* for people to tell a white male child that he's inherently racist?
  - <https://college.georgetown.edu/academics/core-requirements/>
- A report by the Heritage Foundation found the average university had over 45 DEI staff spread out over every department in the school.
- This report also found DEI staff outnumbered the staff in history departments by one to *three times*.
  - <https://www.heritage.org/education/report/diversity-university-dei-bloat-the-academy>
- An entire generation is being PROGRAMMED, and we're rapidly losing them.
- The people pushing this don't give a crap about Diversity Equity and Inclusion. For people like the Davos elites, this is about programming a specific way of thinking. For others, it's about getting rich.
- The head of DEI at Berkeley, Dania Matos, makes \$325,000 per year as a *base* salary.
  - <https://diversity.berkeley.edu/vice-chancellor-dania-matos>
  - <https://regents.universityofcalifornia.edu/regmeet/june21/g2.pdf>
- For context, the tenth highest paying job in the U.S. is a pilot at \$134,000.
  - The fourth is a *surgeon* at \$208,000
  - The first is an anesthesiologist, also at \$208,000.

- <https://money.usnews.com/careers/best-jobs/rankings/best-paying-jobs>
- All of these jobs either require advanced degrees, training *or both* and they don't EVEN TOUCH the salary of a person who is paid to tell white kids they're racist.
